

FLUOROGAL MITE® Red
FLUOROGAL MITE® Green

Medium Fluoride Concentration Solution for Dental Care and Preventive Protection in Children and Adults

COMPOSITION

0,3% sodium fluoride

CHARACTERISTICS

Fluorogal MITE Solution is medium fluoride concentration solution that with regular use increases fluoride concentration on all dental surfaces and in dental plaque, thus promotes dental care and teeth protection from caries.

Refreshes the breath.

METHOD OF USE

Fluorogal MITE Solution is used for organized local application of fluoride to rinse the mouth within dental prevention programme, under the supervision of health personnel. It can be used individually, also, at home, twice a month.

Having brush your teeth, pour the Fluorogal MITE Solution in amount of 10ml and swirl it around in the mouth for 1 minute. Then keep spitting it out intensively and do not take food or fluid half an hour afterwards.

NOTE

Do not swallow the solution!

Close the bottle immediately after use.

STORAGE

Store at the temperature from 15°C - 30°C.

S2: Keep out of the reach of children.

SHELF LIFE

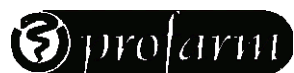

2 years.
